## **Conquering Multiple Sclerosis: The MS Diet** MD, Hannah Yoseph

By the co-author of the popular book "How Statin Drugs Really Lower Cholesterol (And Kill You One Cell at a Time)". What if...just what if...MS is caused by hidden infection inside cells but undetected by current medical tests? If so, antibiotics like Doxycycline should have some positive effect -- and do! If this paradigm is correct (and multiple layers of evidence demonstrate that it is) then the current treatments, based on the belief that there is no infection in MS, violates the medical mandate to "first, do no harm". Here is indisputable evidence that MS is caused by fungal toxins like statin drugs and other fungal-like toxins from opportunistic infection inside cells due to a body out of balance. This book therefore requires courage because it demands change and choice -- to change conventional thinking or to embrace the old paradigms which do not cure. If you've been told you have MS, the choice is yours! A radical and whole new view on the MS-toxin connection, this book is about hope, medicine at the causal level, personal accountability, do no harm remedy and a willingness to disown a mysterious disease with a mysterious name and all the commensurate good intentions, bad medicine and open-ended profits for big pharma -- impossible for many but not for the brave-hearted demanding answers that make sense. It is not a recounting of available conventions but rather a whole new convention. For those who truly want health restored rather than the current downward spiral, they will find the strength to change their minds -- one of the most difficult things for anyone to do once a mainstream profit-driven mindset is made on a matter. A fresh view on the MS-toxin-infection connection (drug-induced MS is also connected to drugs that are fungal toxins), this book is about hope, medicine at the causal level, personal accountability and do no harm prevention and remedy. If you've been told by your doctor you have MS then you've been told that there is no cure. Dr. Yoseph explains how MS is not a diagnosis but a description, and without a proper diagnosis there can be no remedy. Toxic drugs to suppress painful symptoms are the best that modern medicine can offer in its current system of belief. Layers of evidence are provided to unlock the so-called mystery of MS. Be ready to open your eyes (some will want to keep their eyes and ears closed), as remedy is made straightforward when the axe is taken to the root of the tree. The MS protocols herein, nevertheless, will not be supported by your physician or your mother as Dr. Hannah Yoseph clearly contradicts the "experts" who are controlled by drug company agendas and resist investigating evidence that contradicts current paradigms. In this book she explores MS at the causal level and again consolidates the science from all over the world: deadly fungal toxins and fungal-like toxins from undetected infection inside cells clearly cause MS. Hannah Yoseph explores the lost science and offers a chance for the suffering and weary. It is a must read for the patient, family and friends. In simple language, she points the way for patients and researchers alike. It is time for medicine to return to its roots: the art and science of healing without harm rather than promoting drugs to "treat" a so-called incurable disease forever rather than cure. Dr. Yoseph's wisdom, based on exhaustive research and practical experience, will give you the hope, knowledge and tools to naturally restore cells back to health and conquer MS.
