Global Attractors of Non-Autonomous Dynamical and Control Systems (Interdisciplinary Mathematical Sciences)

David N Cheban

Global Attractors of Non-Autonomous Dynamical and Control Systems (Interdisciplinary Mathematical Sciences) David N Cheban

The study of attractors of dynamical systems occupies an important position in the modern qualitative theory of differential equations. This engaging volume presents an authoritative overview of both autonomous and non-autonomous dynamical systems, including the global compact attractor. From an in-depth introduction to the different types of dissipativity and attraction, the book takes a comprehensive look at the connections between them, and critically discusses applications of general results to different classes of differential equations.

The new Chapters 15–17 added to this edition include some results concerning Control Dynamical Systems — the global attractors, asymptotic stability of switched systems, absolute asymptotic stability of differential/difference equations and inclusions — published in the works of author in recent years.

From reader reviews:

Jeffrey Thompson:

The book Global Attractors of Non-Autonomous Dynamical and Control Systems (Interdisciplinary Mathematical Sciences) can give more knowledge and information about everything you want. Why must we leave the good thing like a book Global Attractors of Non-Autonomous Dynamical and Control Systems (Interdisciplinary Mathematical Sciences)? A number of you have a different opinion about publication. But one aim that will book can give many details for us. It is absolutely right. Right now, try to closer with the book. Knowledge or details that you take for that, you can give for each other; you could share all of these. Book Global Attractors of Non-Autonomous Dynamical and Control Systems (Interdisciplinary Mathematical Sciences) has simple shape however, you know: it has great and big function for you. You can search the enormous world by open up and read a e-book. So it is very wonderful.

Carol Ratliff:

What do you regarding book? It is not important along? Or just adding material when you want something to explain what the ones you have problem? How about your free time? Or are you busy particular person? If you don't have spare time to do others business, it is give you a sense of feeling bored faster. And you have free time? What did you do? Every person has many questions above. They should answer that question because just their can do which. It said that about book. Book is familiar in each person. Yes, it is suitable. Because start from on kindergarten until university need this particular Global Attractors of Non-Autonomous Dynamical and Control Systems (Interdisciplinary Mathematical Sciences) to read.

Michael Lockwood:

The guide with title Global Attractors of Non-Autonomous Dynamical and Control Systems (Interdisciplinary Mathematical Sciences) contains a lot of information that you can find out it. You can get a lot of help after read this book. This particular book exist new understanding the information that exist in this e-book represented the condition of the world at this point. That is important to yo7u to find out how the improvement of the world. That book will bring you in new era of the internationalization. You can read the e-book on the smart phone, so you can read it anywhere you want.

Heather Garcia:

Typically the book Global Attractors of Non-Autonomous Dynamical and Control Systems (Interdisciplinary Mathematical Sciences) has a lot info on it. So when you make sure to read this book you can get a lot of advantage. The book was written by the very famous author. Mcdougal makes some research prior to write this book. This kind of book very easy to read you may get the point easily after perusing this book.
