Differential Diagnosis in Computed Tomography Bhargava Sumeet

This book is revised keeping in view of the various new requirements. Large numbers of illustrations have been added to give clear and precise view of the particular disease. This book covers the various disease conditions giving similar imaging findings on Computed Tomography (CT). An attempt has been made to include most of the disease processes/conditions of every organ system which can be diagnosed on CT. The typical CT findings of the conditions have been enumerated with other relevant information. More than 350 images and illustrations have been given wherever necessary to make a visual impact of the imaging finding. A lot of effort has been made to present the information in a vivid manner with the help of tables, so as to segregate the various clinical conditions. The differentiating features have been highlighted in the text. In this book purposely avoided repetition of the text related to the various conditions and all have been described at one place or in the system where it is most relevant. The book proves to be of great help for all the radiologists and even the residents and clinicians to have a better understanding of the subject.
