**Integrating Information Infrastructures with GI Technology (Innovations in GIS)** Bruce M. Gittings  
Integrating Information with GI Technology examines the components necessary for building infrastructure to support the panoply of Geographic Information (GI) research and services. These include novel approaches to two- and three-dimensional spatial analysis and spatio-temporal modelling. The book establishes the case for the Web as the technological backbone of internet and intranet environments, whilst recognising the importance of efficient implementation and the need for high-performance computing to deliver services and share data in an effective manner.

This book represents a change in the direction of the Innovation series by focusing on the most innovative current research and professional in the expanding market for GI services should find this an invaluable resource.
