**Resolving Human-Wildlife Conflicts: The Science of Wildlife Damage Management** Michael R. Conover

As more and more people crowd onto less and less land, incidences of human-wildlife conflicts will only increase. A comprehensive overview of this emerging field, *Resolving Human-Wildlife Conflicts: The Science of Wildlife Damage Management* discusses the issues facing wildlife managers and anyone else dealing with interactions between wildlife and humans. By defining the discipline of wildlife damage management, this book fills a void in the fields of wildlife management and ecology.

The director of the Jack H. Berryman Institute, the only academic institute devoted to wildlife damage management, author Michael Conover is the leader in this field. In this book, he stresses the inter-relatedness of wildlife damage management within the larger discipline of wildlife conservation and provides an extensive review of the scientific literature. He includes case-studies that document how an integrated approach to wildlife management can resolve wildlife-human conflicts.

Nowhere else will you find the authoritative coverage and depth of theoretical information available in *Resolving Human-Wildlife Conflicts: The Science of Wildlife Damage Management*. The combination of descriptive prose, historical details, and liberal use of informative sidebars add to its appeal as a textbook, while the organization and scope make it the ideal reference for professionals.
