Adaptive Radiation Therapy (Imaging in Medical Diagnosis and Therapy) X. Allen Li, X. Allen

Modern medical imaging and radiation therapy technologies are so complex and computer driven that it is difficult for physicians and technologists to know exactly what is happening at the point-of-care. Medical physicists responsible for filling this gap in knowledge must stay abreast of the latest advances at the intersection of medical imaging and radiation therapy. This book provides medical physicists and radiation oncologists current and relevant information on Adaptive Radiation Therapy (ART), a state-of-the-art approach that uses a feedback process to account for patient-specific anatomic and/or biological changes, thus delivering highly individualized radiation therapy for cancer patients. The book should also benefit medical dosimetrists and radiation therapists.

Adaptive Radiation Therapy describes technological and methodological advances in the field of ART, as well as initial clinical experiences using ART for selected anatomic sites. Divided into three sections (radiobiological basis, current technologies, and clinical applications), the book covers:

- Morphological and biological biomarkers for patient-specific planning
- Design and optimization of treatment plans
- Delivery of IMRT and IGRT intervention methodologies of ART
- Management of intrafraction variations, particularly with respiratory motion
- Quality assurance needed to ensure the safe delivery of ART
- ART applications in several common cancer types / anatomic sites

The technology and methodology for ART have advanced significantly in the last few years and accumulated clinical data have demonstrated the need for ART in clinical settings, assisted by the wide application of intensity modulated radiation therapy (IMRT) and image-guided radiation therapy (IGRT). This book shows the real potential for supplying every patient with individualized radiation therapy that is maximally accurate and precise.

From reader reviews:

Cindy Searcy:

Have you spare time to get a day? What do you do when you have more or little spare time? Yes, you can choose the suitable activity for spend your time. Any person spent their particular spare time to take a walk, shopping, or went to typically the Mall. How about open or read a book called Adaptive Radiation Therapy (Imaging in Medical Diagnosis and Therapy)? Maybe it is to become best activity for you. You realize beside you can spend your time together with your favorite's book, you can more intelligent than before. Do you agree with its opinion or you have different opinion?

Gregory Morrow:

The guide untitled Adaptive Radiation Therapy (Imaging in Medical Diagnosis and Therapy) is the e-book that recommended to you you just read. You can see the quality of the publication content that will be shown to you. The language that publisher use to explained their way of doing something is easily to understand. The copy writer was did a lot of analysis when write the book, hence the information that they share for you is absolutely accurate. You also can get the e-book of Adaptive Radiation Therapy (Imaging in Medical Diagnosis and Therapy) from the publisher to make you more enjoy free time.

Peter Mullins:

A lot of people always spent their free time to vacation or even go to the outside with them family members or their friend. Do you know? Many a lot of people spent these people free time just watching TV, or maybe playing video games all day long. If you wish to try to find a new activity here is look different you can read the book. It is really fun for yourself. If you enjoy the book that you just read you can spent the whole day to reading a publication. The book Adaptive Radiation Therapy (Imaging in Medical Diagnosis and Therapy) it doesn't matter what good to read. There are a lot of people that recommended this book. These were enjoying reading this book. When you did not have enough space bringing this book you can buy the e-book. You can more very easily to read this book through your smart phone. The price is not to fund but this book possesses high quality.

Gilbert Pellerin:

Reading a book to get new life style in this year; every people loves to go through a book. When you go through a book you can get a wide range of benefit. When you read books, you can improve your knowledge, because book has a lot of information on it. The information that you will get depend on what types of book that you have read. If you need to get information about your research, you can read education books, but if you act like you want to entertain yourself look for a fiction books, this sort of us novel, comics, and also soon. The Adaptive Radiation Therapy (Imaging in Medical Diagnosis and Therapy) offer you a new experience in examining a book.
