Endovascular Interventions: A Case-Based Approach Robert S. Dieter

Endovascular Interventions uses a case-based approach to present the current methodology used for the treatment of peripheral arterial and venous diseases. Utilizing a series of case studies, the book presents readers with a range of complexities and complications encountered in daily practice, along with tips and tricks for overcoming them. Chapters are organized to give a comprehensive look at conditions involved in endovascular interventions, including intracranial strokes, lower extremity artery disease, access-related pseudoaneurysm, complications of intra-aortic balloon pumps, aortic dissections, and septic arteritis.

Endovascular Interventions: A Case-Based Approach is a practical guide and valuable resource for the practicing interventional cardiologist, interventional radiologist, vascular surgeon and cardiothoracic surgeon.
