**Adaptive Perspectives on Human-Technology Interaction: Methods and Models for Cognitive Engineering and Human-Computer Interaction (Series in Human-Technology Interaction)** Alex Kirlik In everyday life, and particularly in the modern workplace, information technology and automation increasingly mediate, augment, and sometimes even interfere with how humans interact with their environment. How to understand and support cognition in human-technology interaction is both a practically and socially relevant problem. The chapters in this volume frame this problem in adaptive terms: How are behavior and cognition adapted, or perhaps ill-adapted, to the demands and opportunities of an environment where interaction is mediated by tools and technology? The authors draw heavily on the work of Egon Brunswik, a pioneer in ecological and cognitive psychology, as well as on modern refinements and extensions of Brunswikian ideas, including Hammond's Social Judgment Theory, Gigerenzer's Ecological Rationality and Anderson's Rational Analysis. Inspired by Brunswik's view of cognition as "coming to terms" with the "casual texture" of the external world, the chapters in this volume provide quantitative and computational models and measures for studying how people come to terms with an increasingly technological ecology, and provide insights for supporting cognition and performance through design, training, and other interventions. The methods, models, and measures presented in this book provide timely and important resources for addressing problems in the rapidly growing field of human-technology interaction. The book will be of interest to researchers, students, and practitioners in human factors, cognitive engineering, human-computer interaction, judgment and decision making, and cognitive science.

**From reader reviews:**

**Mary Moore:**

Reading a publication can be one of a lot of action that everyone in the world adores. Do you like reading book so. There are a lot of reasons why people like it. First reading a book will give you a lot of new info. When you read a e-book you will get new information simply because book is one of various ways to share the information as well as their idea. Second, studying a book will make you actually more imaginative. When you reading through a book especially hype book the author will bring that you imagine the story how the people do it anything. Third, you may share your knowledge to some others. When you read this Adaptive Perspectives on Human-Technology Interaction: Methods and Models for Cognitive Engineering and Human-Computer Interaction (Series in Human-Technology Interaction), you could tells your family, friends and soon about yours reserve. Your knowledge can inspire the mediocre, make them reading a book.

**Nathan Weaver:**

The book with title Adaptive Perspectives on Human-Technology Interaction: Methods and Models for Cognitive Engineering and Human-Computer Interaction (Series in Human-Technology Interaction) includes a lot of information that you can study it. You can get a lot of advantage after read this book. This kind of book exist new expertise the information that exist in this guide represented the condition of the world at this point. That is important to yo7u to be aware of how the improvement of the world. This book will bring you in new era of the syndication. You can read the e-book on your own smart phone, so you can read this anywhere you want.

**James Henderson:**

Are you kind of occupied person, only have 10 or maybe 15 minute in your day to upgrading your mind skill or thinking skill actually analytical thinking? Then you are experiencing problem with the book when compared with can satisfy your short time to read it because this all time you only find book that need more time to be examine. Adaptive Perspectives on Human-Technology Interaction: Methods and Models for Cognitive Engineering and Human-Computer Interaction (Series in Human-Technology Interaction) can be your answer because it can be read by you actually who have those short free time problems.

**Janice Evans:**

Beside this kind of Adaptive Perspectives on Human-Technology Interaction: Methods and Models for Cognitive Engineering and Human-Computer Interaction (Series in Human-Technology Interaction) in your phone, it could possibly give you a way to get closer to the new knowledge or details. The information and the knowledge you are going to got here is fresh in the oven so don't become worry if you feel like an old people live in narrow small town. It is good thing to have Adaptive Perspectives on Human-Technology Interaction: Methods and Models for Cognitive Engineering and Human-Computer Interaction (Series in

Human-Technology Interaction) because this book offers for your requirements readable information. Do you sometimes have book but you seldom get what it's about. Oh come on, that won't happen if you have this inside your hand. The Enjoyable option here cannot be questionable, just like treasuring beautiful island. Techniques you still want to miss the item? Find this book and read it from now!
