Remote Sensing Imagery (Iste)

Remote Sensing Imagery (Iste)

Dedicated to remote sensing images, from their acquisition to their use in various applications, this book covers the global lifecycle of images, including sensors and acquisition systems, applications such as movement monitoring or data assimilation, and image and data processing.

It is organized in three main parts. The first part presents technological information about remote sensing (choice of satellite orbit and sensors) and elements of physics related to sensing (optics and microwave propagation). The second part presents image processing algorithms and their specificities for radar or optical, multi and hyper-spectral images. The final part is devoted to applications: change detection and analysis of time series, elevation measurement, displacement measurement and data assimilation.

Offering a comprehensive survey of the domain of remote sensing imagery with a multi-disciplinary approach, this book is suitable for graduate students and engineers, with backgrounds either in computer science and applied math (signal and image processing) or geo-physics.

About the Authors

Florence Tupin is Professor at Telecom ParisTech, France. Her research interests include remote sensing imagery, image analysis and interpretation, three-dimensional reconstruction, and synthetic aperture radar, especially for urban remote sensing applications.

Jordi Inglada works at the Centre National d'Études Spatiales (French Space Agency), Toulouse, France, in the field of remote sensing image processing at the CESBIO laboratory. He is in charge of the development of image processing algorithms for the operational exploitation of Earth observation images, mainly in the field of multi-temporal image analysis for land use and cover change.

Jean-Marie Nicolas is Professor at Telecom ParisTech in the Signal and Imaging department. His research interests include the modeling and processing of synthetic aperture radar images.

From reader reviews:

John Jonas:

Inside other case, little men and women like to read book Remote Sensing Imagery (Iste). You can choose the best book if you like reading a book. So long as we know about how is important any book Remote Sensing Imagery (Iste). You can add information and of course you can around the world by the book. Absolutely right, due to the fact from book you can know everything! From your country until finally foreign or abroad you will be known. About simple matter until wonderful thing it is possible to know that. In this era, we could open a book or maybe searching by internet device. It is called e-book. You need to use it when you feel uninterested to go to the library. Let's examine.

Gabriel Reyes:

The book Remote Sensing Imagery (Iste) can give more knowledge and information about everything you want. Why then must we leave the great thing like a book Remote Sensing Imagery (Iste)? Some of you have a different opinion about e-book. But one aim that will book can give many facts for us. It is absolutely correct. Right now, try to closer with the book. Knowledge or facts that you take for that, it is possible to give for each other; you can share all of these. Book Remote Sensing Imagery (Iste) has simple shape but the truth is know: it has great and large function for you. You can look the enormous world by start and read a e-book. So it is very wonderful.

Natalia Burton:

Now a day people who Living in the era everywhere everything reachable by connect to the internet and the resources within it can be true or not involve people to be aware of each details they get. How people have to be smart in receiving any information nowadays? Of course the correct answer is reading a book. Reading through a book can help individuals out of this uncertainty Information specifically this Remote Sensing Imagery (Iste) book since this book offers you rich information and knowledge. Of course the information in this book hundred pct guarantees there is no doubt in it you probably know this.

Garry Brown:

Reading a book being new life style in this 12 months; every people loves to read a book. When you examine a book you can get a large amount of benefit. When you read ebooks, you can improve your knowledge, simply because book has a lot of information in it. The information that you will get depend on what types of book that you have read. If you want to get information about your study, you can read education books, but if you want to entertain yourself you are able to a fiction books, such us novel, comics, and soon. The Remote Sensing Imagery (Iste) will give you a new experience in reading through a book.
