## **Mechanisms of Life History Evolution: The Genetics and Physiology of Life History Traits and Trade-Offs** Thomas Flatt, Andreas Heyland

Life history theory seeks to explain the evolution of the major features of life cycles by analyzing the ecological factors that shape age-specific schedules of growth, reproduction, and survival and by investigating the trade-offs that constrain the evolution of these traits. Although life history theory has made enormous progress in explaining the diversity of life history strategies among species, it traditionally ignores the underlying proximate mechanisms.

This novel book argues that many fundamental problems in life history evolution, including the nature of trade-offs, can only be fully resolved if we begin to integrate information on developmental, physiological, and genetic mechanisms into the classical life history framework. Each chapter is written by an established or up-and-coming leader in their respective field; they not only represent the state of the art but also offer fresh perspectives for future research. The text is divided into 7 sections that cover basic concepts (Part 1), the mechanisms that affect different parts of the life cycle (growth, development, and maturation; reproduction; and aging and somatic maintenance) (Parts 2-4), life history plasticity (Part 5), life history integration and trade-offs (Part 6), and concludes with a synthesis chapter written by a prominent leader in the field and an editorial postscript (Part 7).

### **From reader reviews:**

#### **Rodney Schmitt:**

This Mechanisms of Life History Evolution: The Genetics and Physiology of Life History Traits and Trade-Offs book is not really ordinary book, you have it then the world is in your hands. The benefit you have by reading this book is definitely information inside this publication incredible fresh, you will get information which is getting deeper you read a lot of information you will get. This Mechanisms of Life History Evolution: The Genetics and Physiology of Life History Traits and Trade-Offs without we understand teach the one who reading through it become critical in thinking and analyzing. Don't always be worry Mechanisms of Life History Evolution: The Genetics and Physiology of Life History Traits and Trade-Offs can bring whenever you are and not make your handbag space or bookshelves' grow to be full because you can have it in the lovely laptop even cell phone. This Mechanisms of Life History Evolution: The Genetics and Physiology of Life History Traits and Trade-Offs having great arrangement in word and layout, so you will not sense uninterested in reading.

#### **Lawrence Seay:**

Do you one of people who can't read enjoyable if the sentence chained inside the straightway, hold on guys this specific aren't like that. This Mechanisms of Life History Evolution: The Genetics and Physiology of Life History Traits and Trade-Offs book is readable by you who hate the perfect word style. You will find the info here are arrange for enjoyable studying experience without leaving also decrease the knowledge that want to deliver to you. The writer associated with Mechanisms of Life History Evolution: The Genetics and Physiology of Life History Traits and Trade-Offs content conveys objective easily to understand by lots of people. The printed and e-book are not different in the content but it just different in the form of it. So , do you nevertheless thinking Mechanisms of Life History Evolution: The Genetics and Physiology of Life History Traits and Trade-Offs is not loveable to be your top checklist reading book?

#### **Jerry Gunnell:**

Reading a book to become new life style in this calendar year; every people loves to read a book. When you learn a book you can get a great deal of benefit. When you read ebooks, you can improve your knowledge, mainly because book has a lot of information into it. The information that you will get depend on what types of book that you have read. If you wish to get information about your research, you can read education books, but if you act like you want to entertain yourself read a fiction books, this kind of us novel, comics, and soon. The Mechanisms of Life History Evolution: The Genetics and Physiology of Life History Traits and Trade-Offs will give you new experience in examining a book.

#### **Titus Johnson:**

That book can make you to feel relax. This book Mechanisms of Life History Evolution: The Genetics and Physiology of Life History Traits and Trade-Offs was colourful and of course has pictures on the website. As

we know that book Mechanisms of Life History Evolution: The Genetics and Physiology of Life History Traits and Trade-Offs has many kinds or category. Start from kids until young adults. For example Naruto or Investigator Conan you can read and believe that you are the character on there. Therefore not at all of book tend to be make you bored, any it makes you feel happy, fun and rest. Try to choose the best book to suit your needs and try to like reading which.
