Service Supply Chain Systems: A Systems Engineering Approach (Communications in Cybernetics, Systems Science and Engineering) Tsan-Ming Choi

Supply chain management is a well-developed area. The traditional supply chains are dynamic systems which include the forward and reverse flows of physical products and the related information and fund. However, a service supply chain is different because the real "product" may take the form of a "service" which implies that many traditionally crucial decisions in supply chain management such as product shipping problems are no longer important. Here, a service supply chain is defined as *a supply network that transfers resources into services or servitised products, with or without physical products, to satisfy customer needs*. As a result, managing a service supply chain system requires innovative strategies with new models. Currently, there is an absence of a comprehensive reference source that provides the state-of-the-art findings on this important topic. It will thus be significant to develop a well-balanced edited volume that includes both theoretical results (from different perspectives) and application cases/studies on service supply chain systems.

This book is a pioneering text on service supply chain systems. It features papers which adopt the systems engineering approach in conducting service supply chain analysis. It includes both theoretical results (from different perspectives) and application cases/studies on service supply chain systems. It will be a good reference book for industrialists and academics who are interested in the service industry, service operations, service management, and service sciences.

From reader reviews:

Kathi Adamo:

Do you have favorite book? In case you have, what is your favorite's book? Publication is very important thing for us to know everything in the world. Each e-book has different aim or goal; it means that e-book has different type. Some people sense enjoy to spend their a chance to read a book. They are reading whatever they get because their hobby is definitely reading a book. How about the person who don't like reading through a book? Sometime, person feel need book whenever they found difficult problem or even exercise. Well, probably you will need this Service Supply Chain Systems: A Systems Engineering Approach (Communications in Cybernetics, Systems Science and Engineering).

Charles Felton:

Reading a publication tends to be new life style in this era globalization. With examining you can get a lot of information that may give you benefit in your life. Together with book everyone in this world can share their idea. Ebooks can also inspire a lot of people. A lot of author can inspire their reader with their story or even their experience. Not only situation that share in the books. But also they write about the ability about something that you need example of this. How to get the good score toefl, or how to teach children, there are many kinds of book which exist now. The authors nowadays always try to improve their proficiency in writing, they also doing some study before they write to the book. One of them is this Service Supply Chain Systems: A Systems Engineering Approach (Communications in Cybernetics, Systems Science and Engineering).

Alberta Townsend:

The guide with title Service Supply Chain Systems: A Systems Engineering Approach (Communications in Cybernetics, Systems Science and Engineering) possesses a lot of information that you can learn it. You can get a lot of help after read this book. That book exist new information the information that exist in this guide represented the condition of the world now. That is important to yo7u to learn how the improvement of the world. This specific book will bring you inside new era of the globalization. You can read the e-book on your own smart phone, so you can read this anywhere you want.

Nancy Maxfield:

Reading can called head hangout, why? Because while you are reading a book particularly book entitled Service Supply Chain Systems: A Systems Engineering Approach (Communications in Cybernetics, Systems Science and Engineering) your brain will drift away trough every dimension, wandering in each and every aspect that maybe mysterious for but surely can be your mind friends. Imaging just about every word written in a reserve then become one contact form conclusion and explanation this maybe you never get previous to. The Service Supply Chain Systems: A Systems Engineering Approach (Communications in Cybernetics, Systems Science and Engineering) giving you an additional experience more than blown away your brain but

also giving you useful data for your better life within this era. So now let us demonstrate the relaxing pattern at this point is your body and mind will be pleased when you are finished studying it, like winning a game. Do you want to try this extraordinary wasting spare time activity?
