Traumatic Disorders of the Knee John M. Siliski, L.C. Howe

Management of knee trauma has changed rapidly over the past decade, with the acquisition of additional knowledge and new surgical techniques. At present, the optimal management of knee injuries requires the synthesis of multiple approaches drawn from orthopaedics and related surgical fields. The goal of this work is to comprehensively discuss the current state of the art in management of all types of knee trauma, including soft tissue and osteoarticular injuries. In order to take care of the patient with knee trauma, the orthopaedic surgeon must be able to assess and manage injuries of menisci, ligaments, articular surfaces, and bone, as all of these structures must work harmoniously for the knee to function properly. This book has been organized into five major sections. The first section on fundamental principles covers anatomy, articular cartilage injury and repair, osteochondral fractures, soft tissue management, extensile exposure, external fixation, and the use of allografts in the knee. These chapters set the stage for the second section, which covers major fractures of the distal femur and tibial plateau, and the third section, where injuries of the extensor mechanism are discussed. In section four, injuries of the menisci and ligaments are covered comprehensively, including discussion of multiple ligament disruptions and knee dislocations. The final section covers late reconstructive problems and complications of knee trauma, including knee stiffness, malunions and nonunions, arthrodesis, total knee replacements for posttraumatic arthritis, fractures about total knee replacement, and extensor mechanism disruption in total knee replacements.

Jonathan Sanders:

As a pupil exactly feel bored to be able to reading. If their teacher questioned them to go to the library in order to make summary for some book, they are complained. Just tiny students that has reading's heart or real their leisure activity. They just do what the professor want, like asked to the library. They go to generally there but nothing reading really. Any students feel that reading through is not important, boring as well as can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. So, this Traumatic Disorders of the Knee can make you feel more interested to read.

Cynthia Harvell:

Reading a e-book make you to get more knowledge from the jawhorse. You can take knowledge and information from the book. Book is created or printed or illustrated from each source this filled update of news. In this modern era like today, many ways to get information are available for an individual. From media social such as newspaper, magazines, science publication, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Do you want to spend your spare time to spread out your book? Or just trying to find the Traumatic Disorders of the Knee when you required it?
