The Chemistry and Technology of Furfural and its Many By-Products (Sugar Series) K.J. Zeitsch

This book is a "world first", since the furfural industry has been traditionally secretive to the point of appearing shrouded in clouds of mystery. Even renowned encyclopedic works have published but scant and often erroneous information on the subject.

Striking a healthy balance between theory and practice, the book leads the reader from reaction mechanisms and kinetics to the technology of making furfural by various old and new processes, using conventional raw materials or sulfite waste liquor. Detailed discussions of means of increasing the yield are of great chemical and technological interest as well as of immense economic importance.

From furfural proper, the treatise shifts to the fascinating field of wanted and unwanted by-products ranging from largely unutilized carboxylic acids to troublesome impurities such as 5-methyl furfural and 2-furyl methyl ketone, and then to extremely valuable serendipitous flavor compounds such as diacetyl and 2,3-pentanedione. A wide variety of derivatives are discussed; considerable space is devoted to polytetrahydrofuran, an important building block of stretchable synthetic fibers, while furan resins from both furfural and furfuryl alcohol are given the attention commensurate with their industrial importance.

Notable supplementary chapters cover the in-line measurement of furfural, the treatment of furfural waste water, and various aspects of corrosion. A chapter on the applications of furfural elaborates not only traditional uses in extracting petroleum and vegetable oils but also the sensational discovery that furfural is a highly effective "indirect nematocide". Without becoming toxic, it changes the microflora of the soil by stimulating bacteria antagonistic to nematodes, thereby reducing the nematode population to zero, at an unprecedented low price. It is believed that this application will be the principal outlet for furfural in the future.

A comprehensive list of physical properties, some never published before, make the book an indispensable companion for producers, users and researchers alike.

From reader reviews:

Samantha Campbell:

Book is to be different for every grade. Book for children till adult are different content. As we know that book is very important for people. The book The Chemistry and Technology of Furfural and its Many By-Products (Sugar Series) has been making you to know about other know-how and of course you can take more information. It is rather advantages for you. The reserve The Chemistry and Technology of Furfural and its Many By-Products (Sugar Series) is not only giving you considerably more new information but also to get your friend when you really feel bored. You can spend your personal spend time to read your book. Try to make relationship with the book The Chemistry and Technology of Furfural and its Many By-Products (Sugar Series). You never feel lose out for everything should you read some books.

Joanne Starks:

Nowadays reading books are more than want or need but also work as a life style. This reading addiction give you lot of advantages. The advantages you got of course the knowledge the actual information inside the book this improve your knowledge and information. The information you get based on what kind of publication you read, if you want have more knowledge just go with education books but if you want experience happy read one with theme for entertaining for instance comic or novel. Often the The Chemistry and Technology of Furfural and its Many By-Products (Sugar Series) is kind of e-book which is giving the reader unforeseen experience.

Janie Williams:

That publication can make you to feel relax. This specific book The Chemistry and Technology of Furfural and its Many By-Products (Sugar Series) was colourful and of course has pictures around. As we know that book The Chemistry and Technology of Furfural and its Many By-Products (Sugar Series) has many kinds or genre. Start from kids until youngsters. For example Naruto or Investigation company Conan you can read and believe you are the character on there. So , not at all of book are generally make you bored, any it offers up you feel happy, fun and unwind. Try to choose the best book to suit your needs and try to like reading that.

Betty Callahan:

A lot of guide has printed but it takes a different approach. You can get it by world wide web on social media. You can choose the top book for you, science, amusing, novel, or whatever by searching from it. It is named of book The Chemistry and Technology of Furfural and its Many By-Products (Sugar Series). You can include your knowledge by it. Without making the printed book, it could add your knowledge and make an individual happier to read. It is most critical that, you must aware about e-book. It can bring you from one spot to other place.
