The Shock of the Anthropocene: The Earth, History and Us Christophe Bonneuil, Jean-Baptiste Fressoz **Dissecting the new theoretical buzzword of the “Anthropocene”**

The Earth has entered a new epoch: the Anthropocene. What we are facing is not only an environmental crisis, but a geological revolution of human origin. In two centuries, our planet has tipped into a state unknown for millions of years.

How did we get to this point? Refuting the convenient view of a “human species” that upset the Earth system, unaware of what it was doing, this book proposes the first critical history of the Anthropocene, shaking up many accepted ideas: about our supposedly recent “environmental awareness,” about previous challenges to industrialism, about the manufacture of ignorance and consumerism, about so-called energy transitions, as well as about the role of the military in environmental destruction. In a dialogue between science and history, *The Shock of the Anthropocene* dissects a new theoretical buzzword and explores paths for living and acting politically in this rapidly developing geological epoch.

Malcolm Thurmond:

As a scholar exactly feel bored in order to reading. If their teacher requested them to go to the library in order to make summary for some publication, they are complained. Just very little students that has reading's spirit or real their leisure activity. They just do what the teacher want, like asked to go to the library. They go to generally there but nothing reading very seriously. Any students feel that examining is not important, boring and can't see colorful images on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this era, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this *The Shock of the Anthropocene: The Earth, History and Us* can make you sense more interested to read.
