Biomolecular Structure and Function

Biomolecular Structure and Function

Biomolecular Structure and Function covers the proceedings of the 1977 'Cellular Function and Molecular Structure: Biophysical Approaches to Biological Problems' symposium. It summarizes the application of several biophysical techniques to molecular research in biology.

This book starts by describing the use of deuterium-labeled lipids, as monitors of the degree of organization of membrane lipids. It also describes the use of carbon-13-labeled lipids, as indicators of molecular mobility. It explains the lipid-protein interactions involving two integral membrane proteins, mitochondrial cytochrome oxidase and calcium-dependent ATPase of muscle sarcoplasmic reticulum. The book goes on to present NMR studies on the organization and conformation of phospholipids, chloroplast membranes, and erythrocyte membranes. It also presents the ESR study of spectrin-phospholipid associations. It discusses the use of fluorescence probes, electrokinetics, neutron diffraction and ion theory studies of phospholipid-protein association, hormone disease, and senescence effects on prokaryotic and eukaryotic cells.

Moreover, this book presents the experiments and phosphorus-31 NMR methodology to simultaneously monitor the intracellular pH and phosphate metabolism in a beating heart, functioning kidney, or an intact living microorganism. This book then describes physical probing of intracellular fluidity and structural changes attending tissue or cell cycles. It also relates relatively narrow lines in the hydrogen-1 NMR spectrum of the extremely viscous complex of the muscle protein troponin and highly polymerized tropomyosin. Structure-function studies of fibrous proteins, such as collagen, actin, and myosin, and active site analysis of enzymes are also presented. Finally, a wide variety of methodologies and technologies is exemplified. This includes proton, carbon, fluorine, phosphorus, and lithium NMR spectroscopy; spin labeling and EPR spectroscopy; chemical studies; light scattering and fluorescence; and electron microscopy.

From reader reviews:

Janet Magnuson:

Nowadays reading books become more than want or need but also turn into a life style. This reading routine give you lot of advantages. The advantages you got of course the knowledge the particular information inside the book this improve your knowledge and information. The knowledge you get based on what kind of e-book you read, if you want send more knowledge just go with schooling books but if you want really feel happy read one together with theme for entertaining including comic or novel. Often the Biomolecular Structure and Function is kind of book which is giving the reader unstable experience.

Raymond Roth:

This book untitled Biomolecular Structure and Function to be one of several books that will best seller in this year, that is because when you read this publication you can get a lot of benefit in it. You will easily to buy this kind of book in the book retailer or you can order it by means of online. The publisher of the book sells the e-book too. It makes you quickly to read this book, since you can read this book in your Smartphone. So there is no reason to you to past this e-book from your list.

India Oakley:

Playing with family in a very park, coming to see the water world or hanging out with pals is thing that usually you could have done when you have spare time, after that why you don't try thing that really opposite from that. One particular activity that make you not sense tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love Biomolecular Structure and Function, you are able to enjoy both. It is excellent combination right, you still desire to miss it? What kind of hang-out type is it? Oh can occur its mind hangout men. What? Still don't obtain it, oh come on its identified as reading friends.

Wilma Tovar:

Some people said that they feel bored when they reading a guide. They are directly felt it when they get a half portions of the book. You can choose often the book Biomolecular Structure and Function to make your reading is interesting. Your skill of reading proficiency is developing when you like reading. Try to choose simple book to make you enjoy you just read it and mingle the opinion about book and studying especially. It is to be very first opinion for you to like to open up a book and go through it. Beside that the guide Biomolecular Structure and Function can to be your brand new friend when you're feel alone and confuse using what must you're doing of that time.
